THOALFOKAR H. JASIM

full stack developer

Full stack developer with 3+ years of specializing in both Front-end, Back-end techniques. experienced with building a fast and scalable web applications from scratch. And all the times I am trying to build an application with the highest sufficient and maximum performance with less complexity.

EXPERIENCE

- 2020 - Until now: Msmar-cvMaker

During this period i developed a full web application for free to help visited clients to generate a self CV resume by using NodeJS framework.

- 2019 - Until now: Msmar-LiveStreaming

the objective was to develop a website to handle Realtime buffer from any streamer and convert it into a shareable format that make any normal user can get access to the stream and watch the Realtime media without panicking.

- 2016 - Until now: Internet Proivder

A good experience in handling client issue and trying to finding the right solutions to each client.

EDUCATION

- 2018 – Until now: University of Technology CS

During this period, I have learned how to build any software application in less both space time, complexity and how these concepts can make the world much beautiful for any software company.

- 2017 – 2019: Udemy & Udacity

In this period, I started learning about how to develop a good and success web site projects and got certificates from both organizations.
